PASSAGE

Both outside and inside handles are always unlocked and free-turning. No keys are required.

PRIVACY

Inside handle push button locks the outside handle. Emergency release is on the outside knob. Closing the door or turning the inside handle releases the button.

ENTRANCE

Inside handle push button locks the outside handle. Outside handle opens with a key or by turning the inside handle.

STOREROOM

Inside handle is always unlocked and free-turning. Outside handle is always locked and unlocks with a key.

CLASSROOM

Inside handle is always unlocked and free-turning. Outside handle is free-turning except when it is locked by a key.

EXIT

Deadlocking latchbolt is activated by the inside knob. Nonremovable blank plate is on the outside.

DUMMY

For applications where a latchbolt is not needed.
